Re: Scott Fulton

To Whom It May Concern:

Scott Fulton is exceptionally well suited to teach Social Sciences in Division III. During his time as a pre intern at Balfour Collegiate, he planned for and taught lessons in Social 20, History 20 and English 20. He gracefully created a welcoming and culturally sensitive environment in which he was able to promote social justice and student citizenship through the Social Sciences. Alongside well supported research Scott draws effectively on his personal experience, to engage students. All of Scott's lessons were well executed and dynamic. He incorporated a variety of resources, technologies, and strategies to create lessons that were participatory and experiential. He aligned student learning objectives with curriculum aims and guidelines.

Reflective, appropriately critical, and self motivated Scott created suitable professional targets to guide his development during pre-internship. Above all, it seemed that Scott's personal and professional philosophy mesh well with the realities of teaching and learning.

Scott's management style is democratic and sincere and he was able to motivate and focus students through planning and preventative measures as well as by appealing to their sense of reason. As well Scott admits and recognizes the potential management challenges other grade levels and class dynamics might provide in groups of students other than the ones he worked most closely with during his pre-internship.

In the midst of all the planning and research that pre interns do to prepare for University studies and the practical experience, Scott volunteered his lunch hours to assist in the English as a Second language' program and made connections with students one on one.

To continue on his current development track Scott Fulton will become an extraordinary teacher.

Sincerely,

Karen Kirby
