

October 9, 2007

I wanted to write this short note to share with you something I think is of no small significance regarding the work Scott Fulton is doing in our school. In particular, I am speaking of the time and dedication that he is putting into coaching football. As the offensive coordinator, I spend a significant amount of time with Scott on the field as he lends his talent and expertise with our quarterbacks and receivers. Not only is he an excellent colleague to work with on the field but he is also an excellent role model for the students to emulate. His dedication is clear as he attends virtually every practice we have and game that we play. His support of our students and his ability to home in on players that could use a little help and encouraging is second to none.

Although this falls outside of regular classroom supervision and duties, we all know that coaching is an inherently important part of teaching. Scott shows full recognition of this fact and puts every bit as much effort and commitment into his coaching responsibilities as he does his teaching duties.

In short, I just wanted to let you know that not only has his help not gone unnoticed, but it has been deeply appreciated - and admired. If we make it all the way to the provincial title, it will be due in a significant part to Scott's time spent with our football players.
